Subject: Yakima Groundwater: Third Party Review

Dr. Tarkalson,

My name is Mike Cox. I work in EPA's Seattle office. I have been working on a project with Sandy Halstead and others in the Yakima Valley. We are trying to link the high nitrate levels in private wells with specific nitrogen sources.

I think Sandy had discussed with you the possibility of you being a third party reviewer of the report we are preparing on our work.

We are hoping to have a draft report for third party review by the first week in November and were hoping you would still be willing to be a reviewer.

We are thinking of a three week turnaround once you receive the report.

Thanks and if you have any questions please call or email. I will give you a heads up on the exact date we expect to have the report ready for review.

Michael Cox
